Hard Skills

Programming: Python, Java
Back-end: Django, kafka, redis
DB: PostgreSQL, MySQL
Data Visualization: Seaborn, Matplotlib
Data Manipulations: Pandas, NumPy, SciPy
ML: Scikit-learn, catboost
DL: PyTorch, Keras, Transformers
DevOps: Docker, Git, Bash
AB-testing, Statistics Hypothesis Testing

Education

Bachelor of Science
ITMO University
Neurotechnologies and programming
2023 - 2027
St. Petersburg, Russia

DA and ML course
Digital Banana
2019 - 2021
St. Petersburg, Russia

Languages

 Russian - Native

 English - C1

Work Experience

Since october 2023
ElDinero Reviews
MLE & NLP ENGINEER

- ◆ Created a system that was collapsing similar topics and increasing total quality(x1.4 to main metric).
- ◆ Upgraded general pipeline on ChatGPT (x1.7 to main metric)
- ◆ Made research about YaGPT, scored metrics
- ◆ Implemented YaGPT pipeline with langchain
- ◆ Finetuned BERT for classifying bad reviews

Projects

Urgant case
Realized a special telegram bot with ITMO ML lab for Evening Urgant. Question generating using qg-gpt
October 2021 - January 2022

Yandex case
Did HR EDA and built model for predicting in which order interviewer should ask his prepared questions
November 2021 - March 2022

Hackathons

AIJC 2021 NLP Track - 2nd place
Multihop question answering using transformers
August 2021 - November 2021

NTO AI 2022, 2023 - Finalist
2022 - OCR handwritten text recognition
2023 - Video Question Answering

BCG Gamma hackathon - solved
Predict number of visits to Invitro clinics related to ticks prediction using ensemble of ARIMA
June 2021

Neuroneft hackathon - 2nd place
Predict the oil price for the next year. Did it with ensemble of Catboost
September 2020
